

YUKTA CHAVAN

0432395521 | chavanyukta@gmail.com | Adelaide, SA | [LinkedIn](#) | [Portfolio](#)

Data Analyst with 3+ years of experience in Power BI, SQL, and Python-driven analytics. Proven track record of transforming complex datasets into actionable business insights, driving data-driven decisions across retail, economic, and CRM domains.

ACHIEVEMENTS:

- Built 10+ Power BI dashboards across retail, economic, and career-tech sectors, applying star-schema data modelling and developing 8-12 DAX measures per dashboard to monitor KPIs including profit margin, YoY growth, and category performance.
- Automated AI-assisted job title classification for Data Career App, using LLM-based prompt logic and rule-based keyword mapping – cutting manual review time from ~2 hours to ~20 minutes, an 80% reduction in manual effort.
- Delivered a retail sales and pricing dashboard evaluating discount impact on revenue and profit margins across 8-12 KPI measures, directly informing pricing and promotional strategy decisions.
- Designed a dynamic Power BI dashboard integrated with Snowflake, enabling KPI tracking and country-level comparisons across major global economies (2013–2017).

WORK EXPERIENCE

Data Workflow Analyst (Remote) Mar 2026 – Present
Data Career App SYDNEY

SaaS-based career tech platform helping job seekers navigate the data careers market. Reporting to the Head of Data.

- Served as the data workflow analyst for DCA's LinkedIn engagement analytics, driving dashboard development and reporting automation to support business monitoring.
- Implemented job title classification using LLM-based prompt logic and rule-based keyword mapping, minimizing manual review time from ~2 hours to ~20 minutes – an 80% reduction in manual effort.
- Designed and maintained Power BI data models using star schema architecture, building 8-12 DAX measures to follow engagement trends and key business metrics.
- Applied Power Query transformations to clean and standardise raw datasets, improving data accuracy and reporting scalability across the platform.
- Collaborated with stakeholders to gather business requirements, delivering dashboards and insights that assisted process improvement and data-driven decision-making.

Database Administrator (Contract) Dec 2025 – May 2026
Austra College Adelaide

Registered Training Organisation (RTO) delivering accredited trade and vocational courses to students across Australia.

- Managed student data integrity across 3 CRM and financial systems (Axcelerate, Zoho CRM, Xero), strengthening accurate reporting for 200+ active student records.
- Performed regular data entry, validation, and reconciliation, ensuring consistency and accuracy of student records across all administrative systems.
- Generated operational and financial reports informing administrative decision-making, including payment tracking and financial record maintenance for 200+ students.
- Collated audit preparation through structured documentation and record verification, ensuring compliance and accuracy of student data.
- Collaborated with cross-functional teams to streamline data workflows, enhancing reporting efficiency across scheduling and performance monitoring processes.

Shift Manager Dec 2022 – Present
McDonalds Australia Adelaide

Global quick-service restaurant chain, one of the world's largest fast-food brands by revenue and store count.

- Managed daily shifts for a team of 5-10 crew members, coordinating staffing and performance to maintain service standards while processing 200-500 customer transactions per shift across dine-in, takeaway, and drive-thru.
- Trained and onboarded 15+ new team members on POS systems, food safety procedures, and customer service standards, ensuring consistent operational compliance across shifts.
- Performed cash handling and end-of-shift reconciliation, supervising accurate till balances while resolving POS issues to reduce transaction delays during high-volume periods

Global technology company specialising in electronic components and signalling systems for rail infrastructure.

- Coordinated project activities across design, procurement, and operations teams advancing the delivery of electronic components and signalling systems for rail infrastructure, analysing workflows to optimise project delivery and supply chain efficiency.
- Streamlined manual reporting workflows using Power Query, PivotTables, and VBA, building Excel dashboards to measure component procurement and delivery timelines, reducing analysis time by 30%.
- Extracted, cleaned, and examined operational data to generate KPI reports on parts availability and project milestones, giving stakeholders in signalling and rail projects the insights needed for informed decision-making.

PORTFOLIO PROJECTS

Retail Sales, Pricing & Customer Performance Dashboard [[LINK](#)]

- Analysed a retail business's financial dataset to evaluate sales performance, profitability, and discount impact, delivering visibility that enabled pricing and business decisions.
- Developed an end-to-end Power BI dashboard using Power Query, DAX, and star-schema data modeling, building time-intelligence measures (YTD, YoY) in collaboration with key business questions around growth and profitability.
- Monitored \$19.91M in sales (a 288% YoY increase) and uncovered a 12.27% average profit margin, with the mid market segment leading at ~27% — surfacing pricing insights that directly informed margin improvement opportunities.

K-Mart Sales Analysis Dashboard [[LINK](#)]

- Consolidated sales performance data across channels, regions, and product categories, enabling faster, data-backed stakeholder decisions for Kmart.
- Developed a dynamic Excel dashboard using PivotTables, Slicers, and Timelines, cleaning and validating raw sales data to trace \$3.19M in total sales at an average of \$707.27 per transaction.
- Uncovered that stores drove the majority of sales vs. online, with NSW as the top-performing state, Home & Living as the top category (\$308.91K), Campbelltown as the top suburb, and Rachael Long as the top manager — enabling faster stakeholder decision-making.

CORE COMPETENCIES

- **Business Intelligence and Visualisation:** Power BI, DAX, Power Query, Data Modelling, Data Visualisation, Dashboard Development, KPI Reporting & Automation.
- **Data Extraction and Manipulation:** SQL, Python, R, Microsoft Excel (Advanced), Statistical Analysis, AI-assisted Analytics.
- **Cloud Data Platforms:** Snowflake, GitHub.
- **Team Workflow Management:** Stakeholder Engagement, Problem Solving, CRM (Axcelerate, Zoho), ERP (Xero).

EDUCATION

THE UNIVERSITY OF ADELAIDE | Adelaide

Master of Data Science (2022 – 2024)

THE DATA ANALYTICS INSTITUTE | Sydney

In Progress

PUNE UNIVERSITY | India

Bachelor of Science, Major in Statistics (2018 – 2021)

IBM CERTIFIED

Databases and SQL for Data Science with Python, Certificate #KNWD15YF9Q4G
